1. Wash and clean both the bumper and lip before applying paint and 3M double side tapes.
2. Apply the 3M double side tape to the highlighted areas in the picture.

\* Make sure tell your installer all top should be at the same level in a straight line!

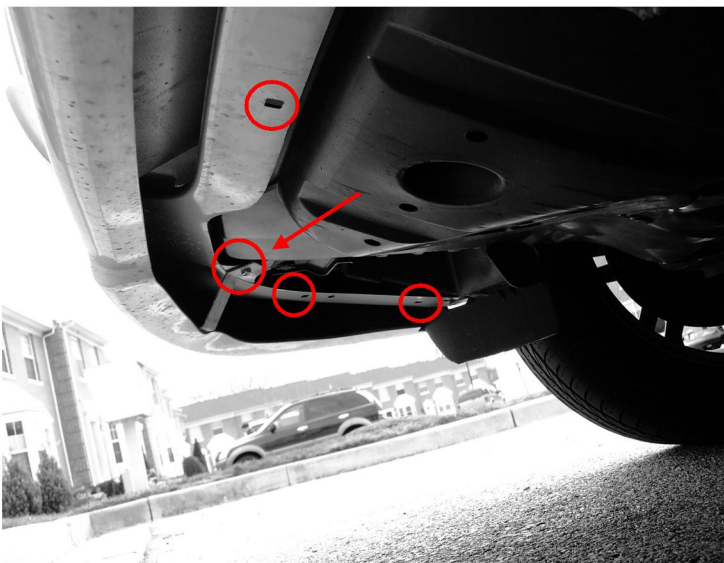

3. Cut a small opening on the lip as shown , to accommodate the brake spoiler which is located right in front of the tires.

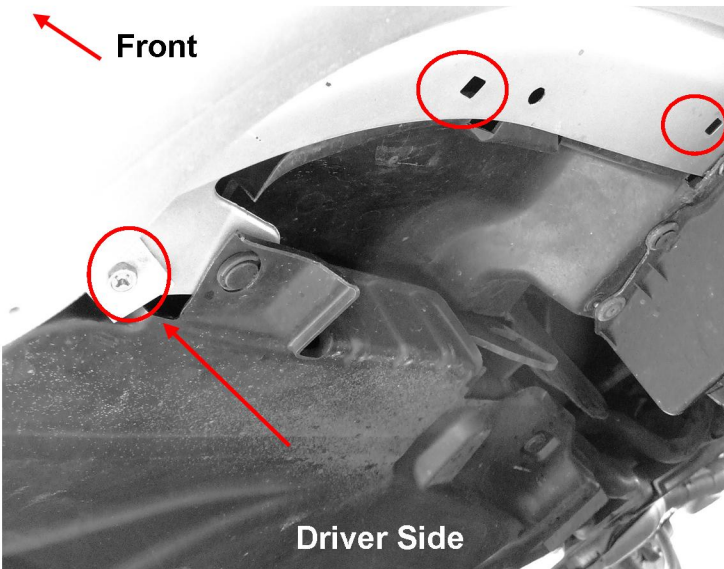

4. Apply the screws on each end of the lip.

5. Apply the Z shape brackets that came with the lip right under the fog lamps.

6. Locate the holes on your OEM bumper (square holes not round ones).

7. Apply the screws in the red circled areas to connect the Z shape bracket to the lip.
